

Handling DST in i-Mate JAM Devices – Windows Mobile 2003 SE

environment

This document provides information on how to modify Daylight Saving Time for i-Mate JAM Pocket PC devices. These devices use Microsoft Windows Mobile 2003 SE (Version 4.2.1088)

To locate the version number of your device:

Tap Start | Settings | System tab | About

The following should be displayed:-

Windows Mobile™ 2003 Second Edition
Version 4.2.1088 (Build 15045.2.6.0)
© 1996-2004 Microsoft Corporation

pre-requisites

The local PC, where ActiveSync is installed, has Microsoft [KB933360](#) timezone patch installed.
The i-Mate JAM device is connected.

resolution

Server

1. Copy [winMob4_DST_ANZ.CAB](#) to the i-Mate JAM device
Use Windows Explorer to navigate to the connected mobile device and copy the CAB file to the device.

2. On the i-Mate JAM device, navigate to the copied file in the My Documents folder
Tap Start | Programs | File Explorer
Tap winMob4_DST_ANZ.CAB

Note You may get a message saying:

The program you have installed may not display properly because it was designed for a previous version of Windows Mobile software.

Tap OK to close the message, as it can be safely ignored

3. Test the Daylight Saving change
Change the date and time on your device to 30th September 2007 01:59:30 a.m.
Tap Start | Settings | System tab | Clock & Alarms
Tap OK
4. Wait for the time to change to 2am. Daylight Saving should roll over and the time should change to 3am
The following message is displayed:
The clock has been updated to daylight saving time. Check clock settings to make sure the time is correct.
Tap OK to close the message
5. Change the date and time on your device to today's date and time
Tap Start | Settings | System tab | Clock & Alarms
Tap OK
